715 - 5th Avenue S.W.

UPPER MECHANICAL ROOM ACCESS

Before access to the mechanical room is granted, please address the following precautions:

- ☐ Hearing protection must be worn at all times while in the mechanical room. (Except in the control room).
- ☐ The mechanical room has the potential to be classified as a confined space. Conditions may include oxygen deficiency or enrichment, toxic or explosive environments, electrical shock and temperature extremes.
- ☐ Most of the piping is insulated, but there are areas that are exposed and could result in burn injury if touched.
- ☐ All hazardous chemicals that are used in the plant operation require MSDS sheets, which are located in the control room.
- ☐ The equipment in the mechanical room is automated and may start without warning. Maintain a 3-foot radius from all equipment.
- ☐ Perform proper lockout procedures on any equipment to be worked on <u>after</u> consulting with Building Operations.
